

Ask EPA Administrator Lisa Jackson to Visit Appalachia

I'm writing to ask you to travel and tour Appalachia to see the destruction created by mountaintop removal coal mining.

To date, almost 500 mountains have been destroyed by the surface mining process known as mountaintop removal. Over 1200 miles of streams and rivers in the region have been buried by debris, and people across Appalachia suffer from the blasting, dirty groundwater and lakes of coal waste poisoning their communities.

Over recent years, influential individuals from Wal-Mart Executives to country music stars have viewed the devastation on the ground and in airplane flyovers. We're asking you and other officials from the Environmental Protection Agency to come to Appalachia and see it for yourself. Regulation of mountaintop removal is not enough. It's time to end it, and it begins with you seeing the destruction for yourself.

Sincerely, the undersigned
